

## **PROJECT DESIGN PHASE - I**

### **AI BASED LOCALISATION OF SKIN DISEASE WITH ERYTHEMA**

#### **SOLUTION ARCHITECTURE**

##### **Solution architecture :**

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the
- software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
